Elevating Japanese Metal Leaf for the Modern Interior

We specialize in a unique, tarnish-resistant metal leaf paper crafted through traditional Japanese gilding techniques. As the only manufacturer in the world with the expertise to produce this material, we offer innovative decorative solutions that blend ancient artistry with contemporary luxury. Our mission is to create new possibilities for sophisticated, culturally significant interiors and lifestyle products.

Over 120 Years of History, Establishing the World's Finest Craftsmanship

Rekiseisha was founded in 1905 by Seijiro Hisanaga. Our family originally served as sword merchants. Drawing on our deep connections with samurai families and wealthy estates, Seijiro shifted our focus to fine interior furnishings, beginning our journey as specialists in decorative folding screens. We initially sourced genuine gold leaf paper from Kyoto for our folding screens, but it was costly and difficult to obtain. Seeking a better solution, Seijiro set out to develop a more accessible alternative using brass leaf. Through years of trial and error with adhesives and rigorous durability testing, he successfully commercialized Japan’s first tarnish-resistant brass leaf paper. This breakthrough offered the same lasting brilliance as real gold, but with a level of durability that made it practical for everyday use. Our reputation for excellence has since spread worldwide, expanding our presence far beyond Japan. Today, Rekiseisha products are featured in prestigious locations across the globe, from historic shrines and temples to modern luxury hotels and world-class art museums.

Creators Who Never Stop Pushing Boundaries, Opening Doors to New Possibilities

At Rekiseisha, every member of our team takes pride in being a creator in their own right. While our work requires the specialized mastery of hand-applying leaf to unique papers, we aim for more than just technical perfection. We encourage every member of our team to constantly exercise their imagination and freely explore new possibilities. This spirit drives us to pursue bold collaborations across various industries, from fashion to electronics, and to experiment with diverse materials. Our commitment to innovation is reflected in our team’s average age of just 35, which is remarkably young for a traditional manufacturer. We take great pride in Japan’s world-renowned aesthetic and traditions, yet we remain flexible and unconstrained by convention. Even after 100 years, our unwavering spirit of challenge remains the core strength of Rekiseisha.

Metal Leaf Paper

Handcrafted Products

The pinnacle of Rekiseisha craftsmanship — where time-honored technique meets fearless creativity. Each sheet of delicate, hard-to-handle metal leaf is applied entirely by hand, one by one, then brought to life through the bold design sensibility of our artisans. Available in 10 varieties, including rare and precious materials. The result is a product of genuine mystique and depth: a tangible expression of Japanese aesthetic values at their finest.

Brass Leaf

Made from brass — an alloy of copper and zinc — this leaf has been imported to Japan since the mid-Meiji era. Its warm gold tone makes it a popular stand-in for genuine gold leaf, delivering strong visual impact at an accessible price point. One of our most widely used materials.

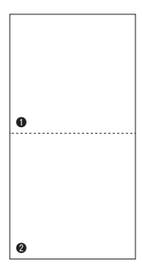

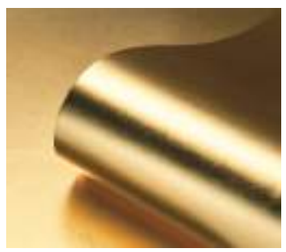

RSY-001 [HAND MADE]
Brass Leaf Flat Press-Paper

Material Brass Leaf, Paper
Repeat approx. 15.7cm × 15.7cm
Size ❶ W92cm × H90cm
❷ W92cm × H1.85m
❸ W92cm × H7.4m

RST-001

Pewter Leaf

Made from pewter. Our most popular leaf at Rekiseisha. Because of the nature of the material, each sheet has a slightly different texture and character — giving it a distinctive, handcrafted feel. Works beautifully across both traditional Japanese and Western-style interiors. Particularly popular with international clients.

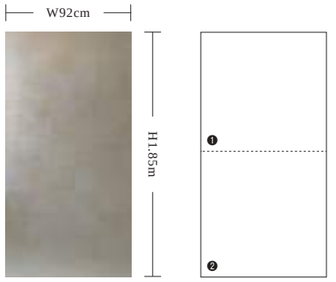

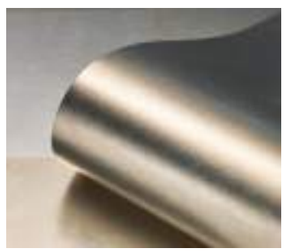

RST-001 [HAND MADE]

RSC-001

Copper Leaf

Made from copper. While one of the older leaf materials historically, it was rarely used for much of that history. Only recently has it begun to be embraced as a color option — and it's steadily gaining traction as a design material in contemporary projects.

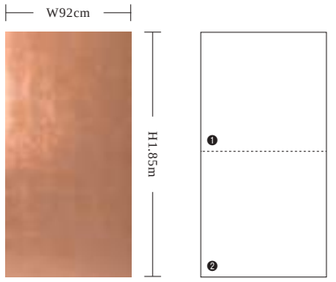

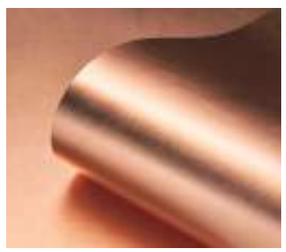

RSC-001 [HAND MADE]

Copper Leaf Flat Press-Paper

RSSR-001

Fumigated Silver Leaf-Red

Pure silver leaf treated with sulfur fumes, triggering a sulfidation reaction that transforms the surface to red. Depending on the process, the same technique can produce red, blue, or black. A uniquely Japanese craft mastered by only a select few artisans. Because each sheet reacts differently, no two are alike — the variation itself becomes part of the pattern.

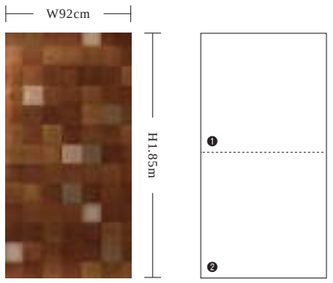

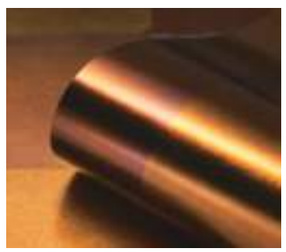

RSSR-001 [HAND MADE]

*Custom lengths and widths beyond options ❶–❸ are available upon request. *For details on post-processing options, refer to p. 49–50.

Fumigated Silver Leaf-Blue

Pure silver leaf treated with sulfur fumes, triggering a sulfidation reaction that transforms the surface to blue. Depending on the process, the same technique can produce red, blue, or black. A uniquely Japanese craft mastered by only a select few artisans. Because each sheet reacts differently, no two are alike — the variation itself becomes part of the pattern.

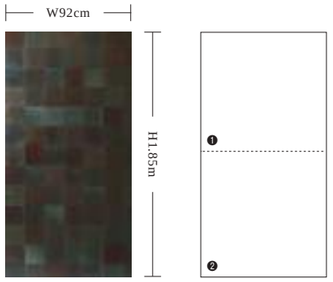

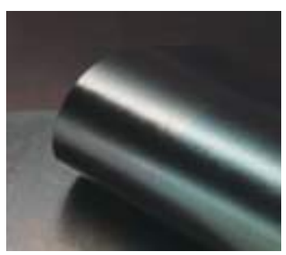

RSSE-001 [HAND MADE]

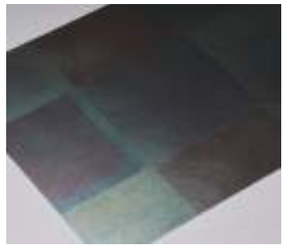

Fumigated Silver Leaf-Blue Flat Press-Paper

Material Fumigated Silver Leaf-Blue, Paper
Repeat approx. 13.5cm × 13.5cm
Size ❶ W92cm × H90cm

Platinum Leaf

A premium leaf that holds its finish even in demanding environments. Compared to gold and silver, platinum is a relative newcomer to decorative leaf work — but its tarnish-resistant properties have made it an increasingly popular alternative to silver. Favored by high-end boutiques and private residences.

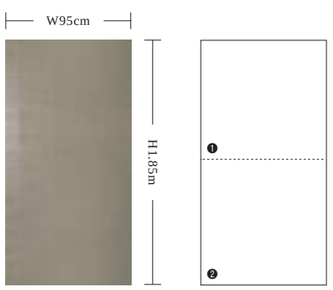

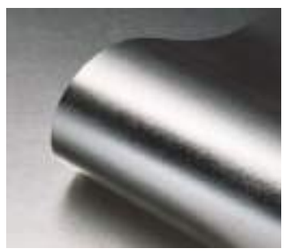

RSP-001 [HAND MADE]

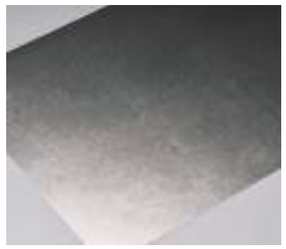

Platinum Leaf Flat Press-Paper

Material Platinum Leaf, Paper

Machine-Processed Products

Using specialized printing techniques and materials, these products recreate the complex, nuanced tones that only genuine foil-stamped paper can achieve — filtered through Rekiseisha's deep understanding of authentic beauty. The lineup is highly versatile: easy to post-process, consistently high quality, and cost-effective. Suitable for a wide range of applications including interior finishing and art installations.

Deposition Foil Paper

A Rekiseisha original featuring vapor-deposited gold and silver. It carries a refined elegance and a quietly commanding presence, making it a flexible choice for a wide range of spatial applications. Priced accessibly without compromising quality — one of our best sellers.

● Existing products ○ Custom-made is available.

■ Flat Press — Paper

Metal leaf applied sheet by sheet onto original washi paper. The foundational technique — the standard of quality for all Metal Leaf products.

■ Flat Press — Vinyl

Metal leaf on a vinyl base. Resists wrinkling compared to paper, making installation more forgiving on site.

■ Flat Press — Matte Paper

Applied to a matte paper base. The paper's texture reads through the leaf, producing a subdued, sophisticated shimmer.

■ Long Long

Inspired by antique Japanese gold folding screens. Developed by our master craftsman — a heritage aesthetic unique to Rekiseisha.

■ Reverse Metal Leaf

Silk applied over flat-pressed metal leaf so the leaf faces inward, creating a deep luminous glow and added abrasion resistance.

■ Surface Metal Leaf

Silk applied first, then metal leaf pressed on top. The leaf sits at the surface, producing a refined sparkle with silk texture beneath.

■ Wood Grain

Two silk layers create a natural wood grain pattern. Soft, deep luminosity with excellent durability.

■ Small Crumble

Metal leaf crushed into tiny fragments and applied all at once. Creates a soft, three-dimensional sparkle with remarkable depth.

■ Large Scatter

Metal leaf broken apart and scattered irregularly across the surface. The non-uniform result creates a bold, artistic impression.

■ Crumple

Flat-pressed metal leaf hand-crumpled by the artisan to create dimensional texture. Every single panel is unique.

■ Grid — Small

Metal leaf pressed in a precise 39mm grid pattern onto washi paper. Clean geometry with handcrafted warmth.

■ Grid — Large

Metal leaf pressed in a bold 78mm grid pattern. A striking architectural presence.

■ Rinpa Style

Metal leaf corners intentionally distorted to evoke the classical Japanese Rinpa art school. A soft, fresco-like shimmer.

*Top coat is applied to surface for all designs.

Post-Processing

Available add-ons: inkjet printing for custom graphic overlays, dosa sizing to control ink absorption for painting and calligraphy, and HAKU LAMI for added durability. Lead times and pricing vary by process. Check the icon in each product's detail section to confirm compatibility.

Inkjet Printing

Inkjet printing applied directly to foil-stamped paper. Print any graphic design — custom wallcoverings, art pieces, or site-specific work.

The Icon for Processing Available ····· Inkjet Printing

Dosa Sizing

A traditional Japanese surface treatment applied to foil-stamped paper using animal glue and alum. It controls how much ink the paper absorbs — reducing bleed and giving you a cleaner, more predictable surface for painting, calligraphy, or sumi ink work.

The Icon for Processing Available ····· Dosa Sizing

HAKU LAMI Finish

箔ラミ
HAKULAMI

A laminate layer added over Metal Leaf paper. Keeps the material's visual character intact while adding resistance to water, dirt, scratches, and UV. Opens up installation contexts that standard Metal Leaf paper can't handle.

The Icon for Processing Available ····· HAKU LAMI

HAKU LAMI — Key Features

1. Water Resistance

The laminate layer repels water, allowing the finish to maintain its visual integrity even in areas prone to light moisture — such as restroom walls or restaurant counter surrounds.

*Not suitable for exterior/outdoor applications.

2. Easy Maintenance

The smooth surface resists dirt buildup and wipes down easily. Pen marks and fingerprints can be removed with a mild neutral detergent, making it a practical choice for high-traffic spaces where aesthetics need to be maintained.

*Permanent marker and similar oil-based stains may not be fully removable.

3. Scratch Resistance

The laminate layer is engineered to resist scuffing and impact, maintaining surface quality even in areas subject to luggage contact or regular physical wear.

4. UV Protection

The laminate layer filters UV radiation, preserving the color and texture of the Metal Leaf in sun-filled environments. Ideal for entryways, lobbies, and areas near windows where long-term appearance matters.

Test Results	Perspiration Fastness		Abrasion Resistance *2	Stain Resistance *3
	Color Change—Acidic *1	Color Change—Alkaline *1		
HAKU LAMI	◎	◎	◎	◎
Standard Metal Leaf Paper	◎	○	△	◎

The table shows JIS standard test results comparing standard foil-stamped paper against HAKU LAMI. HAKU LAMI outperformed standard Metal Leaf paper across all three categories: perspiration fastness, abrasion resistance, and stain resistance.

*All ratings are proprietary standard values based on the test methods listed below.
Applying JIS L0848 mutatis mutandis to *1 Applying JIS L 1096 E mutatis mutandis to *2
Applying JIS L1919 C mutatis mutandis to *3

[Installation Guidelines]

- Do not apply to non-absorbent substrates such as metal panels, glass, or moisture-resistant board. The adhesive will not cure properly and may cause discoloration or corrosion.
- Applying too much adhesive will prevent proper curing and increases the risk of discoloration or corrosion.
- Remove any adhesive residue at the edges with a damp cloth, then thoroughly dry with a clean dry cloth.
- Creases or deep wrinkles created during installation cannot be corrected afterward. Handle with care throughout the process.

[Post-Installation Guidelines]

- Allow the adhesive to cure completely before installing any fixtures or hardware (outlet covers, ventilation grille plates, cabinetry components). Installing before full cure can cause electrochemical reactions leading to discoloration or corrosion.
- Pressing sharp objects into the surface may cause indentation. Not suitable for applications involving sustained load or concentrated pressure, such as countertops.

Reflections

A curated collection of approximately 100 handcrafted pieces, each with exceptional visual character

From refined classics steeped in tradition to bold, boundary-pushing designs, our lineup speaks to a wide range of spatial visions — regardless of whether the aesthetic is Japanese, Western, or somewhere in between. Every product is handcrafted, backed by the world's finest technique. This is Rekiseisha at its fullest — and for design-minded clients who seek genuine expression, it offers something genuinely new.

REFLECTIONS MORE

Bold, edge-forward design realized through specialty printing —

A collection defined by rich, expressive tones with genuine depth and character. We want to push the possibilities of Metal Leaf further. We want to move people. What does a space truly need in order to nourish the people who inhabit it? We believe the answer goes beyond beauty alone — it lives in the maker's intention, felt through every surface. Honoring tradition while layering in a contemporary sensibility, we seek forms that settle naturally into everyday life. The spirit and aesthetic philosophy that Rekiseisha has cultivated over generations is present in every single piece.

REKISEISHA

Metal Leaf Goods

A foil goods collection where contemporary creative vision meets Rekiseisha's time-honored technique

From high-purity edible gold leaf for culinary use, to thoughtfully crafted gifts that bring genuine delight, to everyday objects that add a touch of luxury to the ordinary — our product range lets you experience the full beauty of Metal Leaf across every dimension of life. Smaller-format gold papers (A2, A3, and more) are also available through our online store. We're happy to support brand customization as well — including custom labeling and spec modifications, handled on a flexible, per-request basis.

REKISEISHA

HAKU PANEL

Japanese tradition, reframed for the contemporary
A new form for Metal Leaf

The beauty of Metal Leaf, a material deeply woven into Japanese culture, brought into a single carefully crafted panel. It commands a space without overpowering it, sitting naturally in both traditional and contemporary interiors while adding depth and richness. Part of the appeal of HAKU PANEL (Metal Leaf Art Panel) is how different combinations produce entirely different results. Suitable for residential spaces, commercial interiors, and art display. Choose freely based on the space and the vision.

Price List / Installation

Price List

For pricing on all listed products, scan the QR code to the right.

Installation

These are delicate products — please review all handling and installation instructions carefully.

Product Notice

As all materials are natural and every product is made entirely by hand, slight variations in surface character and texture are inherent to each sheet.

Minor color variations may occur between different order quantities.

The Metal Leaf surface is a delicate finish. Contact with sharp objects or adhesive materials such as masking tape may cause delamination. Handle with extreme care.

Installation Precautions

Do not apply to non-absorbent surfaces or substrates. Adhesive will fail to cure and may cause discoloration or corrosion.

If adhesive, moisture, or perspiration contacts the surface during installation, wipe it away immediately. The products in this sample book are protected by a top coat, but prolonged exposure to residue will erode the coating over time, significantly increasing the risk of discoloration or corrosion. Please take care.

Installation Method

For step-by-step instructions, refer to our installation video.
